- ✓ Reviewed & Assessed by Anexa Vet Product Assessment Team & Calf Rearing Group
- ✓ Good curding & highly digestible powder
- ✓ Blend of New Zealand sourced natural milk powders
- ✓ Made locally in the Bay Of Plenty
- ✓ Contains coccidiostat, vitamins, minerals and free flow agent
- ✓ Comparable to mainstream milk replacer products

Premium Calf Milk Replacer

A good curding and highly digestible calf milk replacer that has been formulated to meet young calves nutritional requirements from 4 days of age.

A blend of New Zealand sourced natural casein (whole milk, skim milk and butter milk) powders fortified with vitamins and minerals, including a free flow agent and Deccox which aids in the prevention of Coccidiosis.

Does not contain whey powder. Mixing rate = 125g

Typical Analysis:

Protein	27%
Fat	21% (max)
Lactose	41%
Minerals	8%
Moisture	3%

Finisher Calf Milk Replacer

A low cost non curding CMR designed to be used after 3 – 4 weeks of age and following the use of standard CMR.

It may also be used as a 50:50 combination with liquid whole milks at 4 days of age following colostrum to assist in reducing rearing costs.

It may also be mixed in to boost liquid whole milk. i.e. 125g mixed into 1 litre of whole milk results in the equivalent of 2 litres of whole milk.

Does not contain whey powder. Mixing rate = 125g

Typical Analysis:

Protein	20%
Fat	20% (max)
Lactose	49%
Minerals	8%
Moisture	3%
